Company Description

P&C Solution is an AR/XR specialized company and has all the unit technologies necessary for AR Glass design, independent optical technology, Hardware technology, etc. to ensure high security and improve competitiveness in industries such as defense, medical care and education.

Product

METALENSE2

Function and Usage : Stand-alone device that can be operated without a separate controller. Enhanced reality content positioning function using built-in AR engine expands the scope of content implementation by enhancing manual/ photograph rather than simple picture plate function.

Marketing and Selling Points : A geometric optical design by our in-house optics development division enables us to provide sharper and cleaner images with higher light efficiency and external light transmittance. In addition to Wifi and Bluetooth, LTE supports long distance data communication outdoors. Moreover, a replaceable battery ensures quick and convenient power supply, regardless of charging device availability.
