Company Description

Our company thinks technology is the best, Accordingly We continued to invest in new technologies and R&D, and tried to improve our technological competitiveness. We are based on our accumulated experience and technology, we are seeking to expand the market through new investment and product development in business

Product

Moving Drone Station

Function and Usage :

1. Description
 - 1) Integrated operation management Drone&Drone station control by GCS
 - 2) Unmanned Operation and Unmanned Autonomous Control of Drones, Maximize uptime
 - 3) Minimize mission waiting times 4) Free movement of stations 5) Multiple drones are control
2. Applicable technology
 - 1) Precision guided landing system
3. Self-powered device : Solar power generation
4. Provision of information
 - 1) Inner&Outer CCTV 2) Provide external environment information by Wind direction / a wind meter

Marketing and Selling Points : We have a experience in facility transactions with large Korean companies based on this experience, we have production system for schedule and quality required by the customer

Fixed Drone Station

Function and Usage :

1. Description
 - 1) Integrated operation management Drone&Drone station control by GCS
 - 2) Unmanned Operation and Unmanned Autonomous Control of Drones, Maximize uptime
 - 3) Minimize mission waiting times 4) Free movement of stations 5) Multiple drones are control
2. Applicable technology
 - 1) Precision guided landing system
3. Self-powered device : Solar power generation
4. Provision of information
 - 1) Inner&Outer CCTV 2) Provide external environment information by Wind direction / a wind meter

Marketing and Selling Points : We have research lab where design personnel and program developers reside, and through this, we have a system that allows us to quickly apply customer requests.
