Company Description

"Beyond Today's Technology, Toward Tomorrow's Experience"

Spacebank aims to become the global DX setter and lead DX innovative technology development. Spacebank provides clients with customized DX roadmap as a tool to transform their daily experiences into data and to manage and understand the data as well as to visualize tomorrow's experience.

Product

AIoT Wright

Function and Usage : AIoT Wright is a smart integrated surveillance system that enables intelligent decision-making in various circumstances. It is a radar sensor-based solution overcoming the limitations of existing CCTV security systems caused by blind spots or inability to recognize motions under special circumstances. Its 3D/4D map-based application provides more realistic image of an object.

Marketing and Selling Points :

MQTT(standard protocol) : providing IoT messaging standards - Intuitive Alarm Setting : Intuitive alarm setting with message / TTS / icon - Providing its DB : Data analysis and data integration nodes - Providing a customsetting function : Custom setting in zones, sensors, icons, etc. - Checking / Tracking sensor history through a dashboard

DataHub Wright

Function and Usage : DataHub Wright is an Enterprise Knowledge Portal Solution based on Big Data collected through various means such as RPA(Robotic Process Automation), API or files uploaded. Clients can obtain Data insight utilizing its DMS(Data Management System) functions.

Marketing and Selling Points :

DataHub Wright will help you with digital transformation

- Elastic Search Engine: Indexing and searching of unstructured data is possible. Search speed is fast.
- Morpheme Analysis Function: Search accuracy is high because natural language processing is possible.
- Configure client's own DB: By configuring DataHub's own DB, Enterprise data management is easy.
- Provides web-based CMS functions

Integrating all smart control-related functions into one platform

Digital transformation: not an option but the imperative.

DataHub Wright solves the problem!
